

HC33 Manual Wire Closer

The HC33 wire binding closer is the most robust manual wire closing unit currently available. Fitted with a useful wire size guide the operator can choose the correct size wire and then close it accurately every time. Economically priced the HC33 wire binding closer is ideally suited to both the high volume and office environments.

When you are looking for robust and reliable wire closing the HC33 manual wire closer is the machine of choice. So, when there is a need for fast accurate wire closing, the HC33 is the wire closer of choice, ideally suited to both high volume and office environments.

Features and Benefits

- **Size Guide:** The integral size guide allows the operator to select the correct size wire for all document sizes.
- **Fine Adjustment:** The fine adjustment screws allow for accurate and consistent Wire closing.
- **Wire Capacity:** The HC33 is the only machine in its class to offer Wire closing from size 3 right through to size 20.
- **Anti-Slip Base:** The rubber base of the HC33 means that the machine will not slip when punching and binding.
- **Compact Design:** The HC33 is both small and light, allowing for easy storage when not in use.
- **Robust Construction:** The all steel construction of the HC33 means years of trouble free usage.
